

## Pressure Building Coils

## Features:

- Horizontal configurations
- All aluminium finned tube extrusions
- Flanged connections to ANSI B16.5

## **Options:**

- The majority of larger capacity custom pressure building vaporizers are designed to suit specific requirements for individual applications, therefore we can't design any pressure building vaporizer to suit your needs.
- Vertical configurations
- Stainless steel or monel linings
- Extra low pressure drop configurations
- Special configurations
- Special end connections

CFPB 1223	3400	2000	600	1150

Capacities are based on nitrogen at 10 barg operating pressure in mean ambient conditions of 21 deg C and 70% Relative humidity for an 8 hour duty cycle with saturated gas at discharge. Ratings will vary for different fluids, changed ambient conditions and duty cycles. The pressure drop is less than 0.1 bar for the above rated flow. Please consult us for technical assistance and a detailed quotation to meet your requirements.
